

MARLON JOSÉ UZCÁTEGUI CONTRERAS

Full Stack Developer | React · TypeScript · Node.js

Remote · Open to International Opportunities · +58 424 775 3043 · marlonjoseuzca@gmail.com · github.com/Marlonuzco · linkedin.com/in/marlon-jose-uzcategui

PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of software development experience, including 3+ years of professional experience building and maintaining production web applications. Strong experience with React, TypeScript, Node.js, Express, SQL Server, and PostgreSQL. Experienced in developing REST APIs, complex data-driven interfaces, authentication and authorization flows, file management, automated processes, and environment-based deployments. Comfortable working across the full development lifecycle, from technical implementation and code review to QA and production releases.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript (ES6+), Next.js, React Native, Redux, Vite, Tailwind CSS, Ant Design, KendoReact, HTML5, CSS3/SCSS, jQuery

Backend: Node.js, Express.js, NestJS, REST APIs, JWT, Joi, Swagger/OpenAPI, Puppeteer, Nodemailer

Databases: SQL Server, PostgreSQL, TypeORM, Prisma ORM

Cloud & DevOps: Azure Blob Storage, Docker, Git, GitHub

Engineering: ESLint, Prettier, Husky, i18next, Pull Requests, Code Review, QA and Production Deployments

AI-assisted development: Cursor, Claude Code, and OpenCode for implementation, debugging, code review, and security analysis. Experienced in defining project specifications and validating AI-assisted changes through linting, type checking, builds, and repository patterns.

PROFESSIONAL EXPERIENCE

Foco en obra

Aug 2024 – Present

Full Stack Developer · Full-time

- Developed and delivered end-to-end features for a production web application, contributing across API development, frontend implementation, QA, code review, and deployment.
- Designed and developed REST APIs using Node.js, Express, and TypeScript with SQL Server and TypeORM, including schema validation, JWT authentication, Azure Blob Storage, and Swagger/OpenAPI documentation.
- Built complex React and TypeScript interfaces including multi-step forms, data grids with filtering and inline editing, hierarchical views, and tracking dashboards using Ant Design and KendoReact.
- Implemented backend automation for email and messaging notifications, file uploads, and file expiration workflows.
- Implemented three-language internationalization with i18next and contributed to QA and production deployments, pull-request reviews, and code quality standards using ESLint, Prettier, and Husky.

Talent360

Nov 2025 – Jun 2026

Full Stack Developer · Freelance

- Developed automated PDF report generation on the backend using Node.js, Express, Puppeteer, and Handlebars.
- Designed data models, migrations, and database queries in PostgreSQL using Prisma ORM.
- Built React and TypeScript views with search, filtering, server-side pagination, and Excel export.

Teampers CRM

Nov 2023 – Nov 2025

Frontend Developer · Freelance

- Rebuilt the frontend of a production PHP/Symfony web application using HTML5, CSS3, and jQuery, improving consistency and maintainability across the application.
- Developed responsive interfaces and reusable UI components to standardize the application's design.
- Fixed and refined the interface in coordination with the backend team while maintaining system availability.
